Revenue Share Investment Structure

About How It Works

The Revenue Share investment structure is designed to help businesses raise growth funding from investors, while maintaining equity, and making monthly payments that are proportional to gross sales volume. This means that you never get squeezed during seasonal sales cycles.

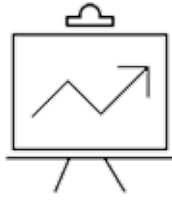

Key Benefits

- Make monthly repayments that are proportional to revenue
- Retain all of the hard earned equity in your business
- Know the total amount to be repaid from the start

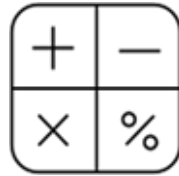

::BOLSTR::

- Receive funding from investors who have aligned incentives

Bolstr Facilitates The Entire Process

Business reports monthly revenue to bolstr

Bolstr verifies revenue and calculates payout amount.

Investor receives direct deposit into bank account
